## COMPONENT SPECIFICATIONS

### SPECIFICATIONS

The SNAP'n SAFE Round Post Surface Mount Breakaway Couplers are manufactured with cast grey iron and are zinc coated according to AASHTO M111 (ASTM 123). The same size coupler is used with PTP30 or any round steel post 2 3/8" [60 mm] diameter (8-16 gauge).

Dimensional tolerances not shown or implied are intended to be those consistent with the proper functioning of the part, including its appearance and accepted manufacturing practices.

### INTENDED USE

The SNAP'n SAFE Round Post Surface Mount Coupler mounts directly to concrete with three bolts. The sign post fits over the coupler and is secured with one bolt. At impact, the sign post breaks away at the coupling and does not strike the roof or windshield of the vehicle. In addition, concrete boring for an anchor post is eliminated.

### ACCEPTANCE

George E. Rice, Jr., Letter to Jim Anderson, Geometric and Roadside Design Acceptance Letter HSSD/SS-156, Federal Highway Administration, Washington, D.C., December 6, 2007.
